EXPERIENCE

Team Member | in college | 2020

in college we have to make a Project in laravel which include designing , front end , back end and Teacher assign team randomly. But i able to blend easily with team and take care of the front-end and help in designing also.

Team Leader | in college | 2020

there is another project in year 2020 of PHP and teacher ask to choose group and i choose the team member suitable for the project and gave them proper instruction and assign suitable work to each member.

Full Stack | self | 2021

I usually do the front-end work when i work in teams but this time i did all work my self from designing to back end and handling database the project is about making social media website which include messaging system.

Hosting The App | self | 2021

This time i learned how to host apps online and connect to the database and do the operations.I hosted the app in firebase.
